

# Your energy production and storage solution

					
Photovoltaic panels	Inverters	Electrical Cabinet — Photovoltaic 250 KVa	DC Cable Trenches	AC Cable Trenches	Perimeter fence

### Structure

3 PV in portrait  
Tilt 15°  
Screwed/driven piles

### Inverters

125kVa  
Output voltage = 400V  
6 units

### Grid connection

LV grid (400V)  
PV electrical cabinet  
(3 x 250kVa)

### Panels

Glass-Glass bifacial  
2382x1134x30mm  
6xxWc

### Site works

Perimeter fence  
DC/AC cabling trench

# One Mega – Siguesol

<b>Panels</b>	<b>1MWp</b>	Glass-Glass - Bifacial – 2382*1134*30mm
<b>Structure</b>		Supply + assembly of the structure, installation and connection of the panels
<b>Inverters</b>	<b>6</b>	Inverter 125kVa – 400V – 10MPPT – DC switch + Support
<b>DC Electricity</b>		Supply + trenches + connection of the DC part of the installation
<b>AC Electricity</b>		Supply + trenches + connection of the AC part of the installation
<b>Site Works</b>		Fencing, Site facilities
<b>TOTAL</b>		<b>Starting from €0.499/Wc</b>

## OPTIONS

Description	Price
800V inverter solution + HV cabin and transformer station	+ €/Wp
Solution with Huawei inverters	+ €/Wp
Storage solution with C&I solution + hybrid inverters	+ €/Wp
Supply and installation of a light track around the solar field (small stone)	+€/m <sup>2</sup>
Supply and installation of a heavy-duty track around the solar field (asphalt)	+€/m <sup>2</sup>
Water tank	+€/m <sup>3</sup>

Configuration change	Price
Price per additional meter of DC cabling	+€/m
Price per additional meter of AC cabling	+€/m
Price per additional meter of fencing	+€/m
Price per additional connection capacity	+€/kva

# With OneMega, Siguesol® offers much more than a simple **photovoltaic project.**

We support you in the design and implementation of a complete, high-performance energy solution perfectly tailored to your needs.

## A turnkey solution

With OneMega, Siguesol® supplies and installs all the equipment required for your solar and storage project. Our service covers the entire value chain, from initial studies to the commissioning of the ready-to-operate installation.

## A project mastered from A to Z

From engineering to commissioning, Siguesol® handles every step:

- Technical and economic sizing
- Selection of reliable and approved technologies
- Construction and on-site integration
- Commissioning and performance optimization

You thus benefit from a single point of contact and perfect control over deadlines, costs and performance.

## Performance, flexibility, profitability

Thanks to the integration of storage, OneMega enables you to:

- Maximize your production
- Monetize your produced energy
- Secure your operations against energy fluctuations

## A forward-looking vision

Our OneMega offer is part of a sustainable approach, actively contributing to the energy transition while enhancing your company's competitiveness.
